Part III DETAILED ACTION

1. This application is a continuation-in-part of 09/123,492 which is a continuation-in-part of PCT/US97/01725 which is continuation-in-part of 08/593,677.

- 2. Claims 13-14 are pending.
- 3. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 4-29-03 has been entered.

The filing accorded the instantly filed claims is 1-3-01 since SEQ ID NO. 3 was not disclosed in the prior applications.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 4. Claims 13-14 are rejected under 35 U.S.C. § 102(b) as being anticipated by Nagakubo. (A).

Nagakubo et al., teaches a polyclonal antibody to protein DJ-1, which Applicant's specification teaches is greater than 90% homologous to SEQ ID NO.3. The prior art polyclonal antibodies would bind to SP22 (SEQ ID NO.3).

The prior art teachings anticipate the claimed invention.
